Year 3-6 Intervention Class - Spring 1 Highlights

A warm welcome to all parents and carers. I would like to express how delighted we are once again to share all the hard work and progress the children have shown this half term. Please continue to celebrate achievements big and small, together at home.

What we've been working on: This term we have focused on learning about Dynamic Earth in Geography. Exploring Earth through maps, atlases, globes and Google Earth has been fascinating and eye opening. Learning about the seasons was tricky as even though it is Spring the weather in reality felt more like autumn- the British weather didn't follow the rules! The class also explored volcanoes and earthquakes and were relieved that these were unlikely to be experienced in Poplar. Please have a go at the experiment below to continue exploring air pollution.

Home Connection:

The "Magic Beam" Hunt

Turn off all the lights and shine a strong flashlight through the room. See those tiny, dancing "sparkles" floating in the light?

Those aren't just bits of dust! They are tiny pieces of skin, fuzzy carpet fibers, and hair. It's a way for kids to actually **see** the stuff that is always floating in the air around us, even when the room looks clean.

Achievements:

I am proud of **Tianna** because she has tried really hard to persevere and not give up when things are hard.
Great job Tianna!

I am proud of **Mustafa** because he has worked really hard to be more vocal and express himself.
Great job Mustafa!

Important Reminders:

Please continue to read together at home with the children. They have really made progress with their reading with expression skills. Thinking ahead to World Book Day 2026 please think about the theme of their costumes; Heroes and Legends. The holiday homework project is about the Roman Empire as that is what they will be learning about when they return to school. Please explore; what was life like in Ancient Rome?

Please stay updated via
My Child at School app.
