Nursery

New life, New Groth and Springtime Magic!

Spring 2 has been such a joyful term in Nursery, and it's been wonderful to see the children really blossom along with the season! Our "New Life" topic was a massive hit-the highlight was definitely having our fluffy school ducklings hatch! It was so heart-melting to watch the children be so gently while they held and stroked them. We've also been busy being nature detectives: watching the life cycle of a butterfly and making our own colourful butterflies to match. Between all the animal magic we have squeezed in so much fun: dressing up for World Book Day, making special surprises and treats for Mother's Day, and getting creative with our Eid and Easter crafts. Through all the excitement, the children have carried on working so hard every day practicing writing their sounds and carrying on with number work. It has been a busy, happy term and we are so proud of how much they are growing!

Reception

From Tiny Seeds to Big Thinkes!

This term has been so heartwarming in Reception as we've explored the magic of "New Life." The children have been complete naturals as little scientists, diving into the life cycles of humans, chicks and caterpillars. It's been amazon to hear them explain exactly what's happening at each stage-they've even been busy getting their hands green and learning how to care for plants! Our budding mathematicians have also taken a huge leap forward; we've been using a number line and 'real-life' objects to master addition and subtraction before turning those ideas into number sentences. We've also been playing lots of games to find 'one more' and 'one less' to really get those number patterns to stick. On top of all the hard work we've had so much fun dressing up for World Book Day and getting creative without beautiful Mother's Day, Eid and Easter crafts. It's been a busy, happy term, and the children are showing so much care for the world around them!
